17 OTHER NOTABLE FEATURES OF BUILDING OR SITE (Interior and Exterior)
This Arts and Crafts-style house features three bays and a steeply pitched hip roof. The lower section of the building is made of cobblestone and the upper section is shingled. An entry porch with a flared gabled roof projects from the facade. Extending from the roof is a dormer with two windows and a chimney.

19 HISTORICAL OR ARCHITECTURAL IMPORTANCE
In 1922 the parish of the St. Patrick's Church Society built the church building which stands south of this building. Two years later this rectory was built. There is little historical information about its construction; however, it is said that Father Francis B. Nolan of St. Justin's Church in Hartford may have designed it. R.F. Jones may have supervised its erection.

The rectory is architecturally significant to the area due to its good representation of the Arts and Crafts style.

St. Patrick's Rectory

This house was built in 1924 to be the home of the priests who served as pastors and assistants at the St. Patrick's Roman Catholic Church next south of this.

The Rev. Fr. M. Ernest Wilson was the first pastor here, and he had rented and occupied the house at 92 Main Street while the church and this rectory were being built. Pastors and assistants who have been residents here are named in the sketch of the church, which follows this.
